

FMF Cape Breton – Op LASER Update 4 June 2020

Current Posture: Transition from 3C “Protect” to 3B “Sustain”

Update Message

This week, we saw some members of the Service Delivery ‘Green Team’ officially re-start ‘regular’ work onsite under our transition to our ‘3B Sustain’ posture. These personnel are re-planning the WIN Short Work Period and planning the REG Defect Rectification Period, both for execution over the next two months or so, and they have made some good headway. Of course, we continue to have a lot of personnel onsite also conducting critical work, including getting a head start on ‘critical path’ jobs in WIN and REG. Many thanks to all these people, as they are also effectively trying out our Exposure Control Plan measures, ensuring that everything works well for the larger parts of Production and Engineering that will start onsite in a week and a half.

This all will lead to our ‘new normal’ – Service Delivery personnel working one week onsite and one week in standby, with others called in for critical work as required. Everyone has shown great flexibility and innovation in continuing to support the fleet over the last couple months, and these strengths are sure to serve us well as we move into this next phase.

Work Priorities

- Support CAL, REG & BRN to facilitate their return to sea;
- Limited support to DND contractual requirements in VAN & OTT;
- Plan to prepare/support Op & Tech Schedules (WIN; REG; VIC; TEK); and
- Support other safety/urgent requirements as directed.

*Due to limited capacity, please do not use DVPNI unless specifically authorized.
Report your status to your supervisor daily by 09h00.*
