

FMF Cape Breton – Op LASER Update 9 September 2020

Current Posture: 3A “Surge”

Update Message

In our “3A” posture, FMFCB continues to work as close to full capacity as possible while the threat of COVID-19 remains relatively low in the region. Comd MARPAC, CO FMFCB and senior management are closely monitoring the recent resurgence of COVID-19 on the island, coupled with the impending return to school, with a review of assessing and adjusting our posture as appropriate. We will continue to get as much work done as we can on current projects, including VIC RWP, CAL SWP, VAN reactivation, overhaul of the ‘Camel’ fenders in the dry dock, support to TEK, OTT, CHI and COR, and repair and overhaul of equipment that will be required to support RCN readiness in the medium and long term.

Thanks to those who have been working extra hours on critical requirements, in particular in VIC over the last few weeks – we are on the cusp of returning this strategic asset back to the sea. Hopefully everyone has still had a chance to enjoy the last of the great summer weather, despite some restrictions on travel in the current situation.

Work Priorities

- Execute work periods to support Op Sched;
 - VIC, CAL, Camel fenders;
- Targeted support to DND contractual requirements in VAN & OTT; and
- Support other safety/urgent requirements as directed.

*Due to limited capacity, please do not use DVPNI unless specifically authorized.
Report your status to your supervisor daily by 09h00.*
