

FMF Cape Breton – Op LASER Update 5 October 2020

Current Posture: 3A “Surge”

Update Message

On the COVID front, the Island Health region continues to be spared the worst of the pandemic – for now. However, expectations are that the fall and winter will present more of a challenge, and that we will all have to exercise increasing vigilance in following public health measures (PHMs) and continue to adapt our own culture and behaviour. The recent FMFCB D250 building evacuation showed that we have come a long way – nearly everyone was wearing a mask, a complete turnaround from the last evacuation in August – great work! Let’s continue to put that kind of effort in across all PHMs.

On the Service Delivery front, we have nearly completed CAL’s SWP, we undocked the barge and fenders in the dry dock last week, we’re preparing the dry dock for REG, and we continue to prepare VAN to move to dockyard in November. It also probably has not escaped many people that VICTORIA, our recent success, is back alongside – but we’ll push on with defect repair to get the submarine back to sea soonest. Thanks all!

Work Priorities

- Execute work periods to support Op Sched: finish CAL, start REG
- Targeted support to DND contractual requirements in VAN & OTT
- Support other safety/urgent requirements as directed

*Due to limited capacity, please do not use DVPNI unless specifically authorized.
Report your status to your supervisor daily by 09h00.*
