

FMF Cape Breton – Op LASER Update 1 February 2021

Current Posture: 3A “Surge”

Update Message

The demand on FMFCB is decreasing a bit as we complete some important projects: CAL’s work period completed a week ago (though we are rectifying a few more defects); and VIC’s work period completed on Friday, as planned, which was a good success for a submarine work period – congratulations and thanks to all who were involved! We are now left with WIN and VAN, which will be deploying in 2021 and in 2022, respectively, both with much work to be completed. Also, today, we are docking the YOM 402 barge in the dockyard dry dock, taking advantage of a great relationship with industry where our docking expertise and facilities are enabling efficient execution of another barge refit.

The CO sent a yard-wide email on Friday articulating some of the factors that he considers when determining if/when a posture change might be necessary – we are not at that stage right now, with all our remaining work in WIN and VAN, and with the still relatively low local COVID risk, but please know that this is something that is reviewed continuously.

Thanks for everyone’s hard work, we are delivering on RCN capability!

Work Priorities

- Execute work periods to support Op Sched: VAN EWP2, WIN SWP;
- Support to DND contractual requirements in OTT, COR, and CHI; and
- Support other safety/urgent requirements as directed.

*Due to limited capacity, please do not use DVPNI unless specifically authorized.
Report your status to your supervisor daily by 09h00.*
