

FMF Cape Breton – Op LASER Update 24 January 2022

Current Posture:

3B “Sustain” – Changing to 3A(S) “Surge – Shift” 31 Jan 22

Update Message

FMFCB has had some good results in the current posture – CAL and VAN are tracking to meet sailing commitments next week, WIN is still on track to meet requirements for deployment this summer, and we are doing our best to reduce the impact of the current posture on OTT and VIC.

On the COVID front, MARPAC moved to a stricter posture to reduce risk, while at the same time data from the province and from DND shows a drop in the rate of new cases and of point prevalence – a very good sign. FMFCB’s positive cases are still almost exclusively due to community transmission, meaning that our measures at work are still effective.

Given all this, and given the operational requirements this year and next, CO FMFCB is directing a new posture for next week (details to come) to increase output while further mitigating COVID risk – we will have a large number of people on shift while keeping the two shifts separate as much as possible. This will certainly have an impact on people’s lives at home, but please know that being able to leverage our full capacity is extremely important right now, given both current world events and future RCN commitments. Thanks for all that you continue to do for Canada.

Work Priorities

- WIN SWP in preparation for RIMPAC and Force Employment summer 2022;
- OTT EWP2 in preparation for TRP and Force Employment summer 2023;
- VAN DRP in preparation for IMSRT, SCC, then RIMPAC and Force Employment; and
- COR EDWP support and reactivation in preparation for TRP this year.
